

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE
AMERICAN NATURALIST,
AN
ILLUSTRATED MAGAZINE
OF
NATURAL HISTORY.

EDITED BY
EDWARD D. COPE AND J. S. KINGSLEY.

ASSOCIATE EDITORS:

W. N. LOCKINGTON, DEPARTMENT OF GEOGRAPHY AND TRAVELS.
W. S. BAYLEY, DEPARTMENT OF MINERALOGY AND PETROGRAPHY.
CHARLES E. BESSEY, DEPARTMENT OF BOTANY.
J. H. COMSTOCK, DEPARTMENT OF ENTOMOLOGY.
JOHN A. RYDER, DEPARTMENT OF EMBRYOLOGY.
OTIS T. MASON, DEPARTMENT OF ANTHROPOLOGY.
C. O. WHITMAN, DEPARTMENT OF MICROSCOPY.

VOLUME XXI.

PHILADELPHIA:
J. B. LIPPINCOTT COMPANY.

1887.

CONTENTS.

Parasitic Bacteria and their Relation to Saprophytes.	<i>Theobald Smith</i>	1
On some Popular Errors in regard to the Eskimos	<i>John Murdoch</i>	9
The Significance of Sex. [Illustrated.]	<i>Julius Nelson</i> . 16, 138, 219	
Description of a New Species of <i>Dipodomys</i> , with some Account of its Habits. [Illustrated.]	<i>F. Stephens</i>	42
History of Garden Vegetables	<i>E. Lewis Sturtevant</i> . . 49, 125, 321, 433, 520, 701, 826, 903, 975	
More about the Sea-Horse	<i>S. Lockwood.</i>	122
The Taconic Question Restated	<i>T. Steery Hunt</i> 114, 238, 312	
The East Greenlanders	<i>John Murdoch</i>	133
The Massasauga and its Habits	<i>O. P. Hay</i>	211
Notes on the Glaciation of the Pacific Coast	<i>G. F. Wright</i>	250
Notes on the Life-History of <i>Monachus tropicalis</i> , the West Indian Seal. [Illustrated.]	<i>H. L. Ward</i>	257
On Oviposition and Nursing in the Batrachian Genus <i>Dendrobates</i> . [Illustrated.]	<i>Herbert H. Smith</i>	307
Metschnikoff on Germ-Layers. [Illustrated.]	<i>H. V. Wilson</i>	334, 419
The Origin of a Small Race of Turkeys	<i>John Dean Caton</i>	350
Sonnets: Cactus—Parnassia	<i>Emily Shaw Forman</i>	354
The Present Condition of the Natural Sciences in Sweden	<i>Filop Trybom</i>	409
Fiddler-Crabs	<i>J. McNair Wright</i>	415
The Mesozoic and Cænozoic Realms of the Interior of North America	<i>Edward D. Cope</i>	445
<i>Araujia albens</i> as a Moth-Trap. [Illustrated.]	<i>Robert E. C. Stearns</i>	501
Biological Instruction in Universities	<i>Charles Otis Whitman</i>	507
Review of the Progress of North American Palæon- tology for the Year 1886	<i>John Belknap Marcou</i>	532
The Dipnoan Brain. [Illustrated.]	<i>Burt G. Wilder</i>	544
Terias Lisa	<i>Laura F. Hinsdale</i>	548
The Milkweeds. [Illustrated.]	<i>Joseph F. James</i>	605
Methods of Instruction in General Geology	<i>H. S. Williams</i>	616
The Range of Variation of the Human Shoulder- Blade. [Illustrated.]	<i>Thomas Dwight</i>	627
Incised Boulders in the Upper Minnesota Valley. [Il- lustrated.]	<i>T. H. Lewis</i>	639
Notes on the Ethnology of the Congo	<i>Walter Hough</i>	689
Notes on Classification and Nomenclature for the American Committee of the International Geological Congress, March, 1887	<i>N. H. Winchell</i>	693
Conventionalism in Ancient American Art. [Illus- trated.]	<i>J. S. Kingsley</i>	713
Comparative Chemistry of Higher and Lower Plants. [Illustrated.]	<i>Helen C. De S. Abbott</i> 719, 800	
Hornless Ruminants. [Illustrated.]	<i>R. C. Auld</i>	730, 885, 1076
Scientific Fact and Scientific Inference	<i>H. W. Conn</i>	791
Instruction in Geological Investigation. [Illustrated.]	<i>William Morris Davis</i>	810
The Study of a Small and Isolated Community in the Bahama Islands	<i>T. Wesley Mills</i>	875

Remarks on Classification of Vertebrata	<i>Burt G. Wilder</i>	913
Sand Boulders in the Drift, or Subaqueous Origin of the Drift, in Central Missouri. [Illustrated.]	<i>J. W. Spencer</i>	917
Materials of the Appalachians. [Illustrated.]	<i>E. W. Claypole</i>	955, 1054
The Progress of Arachnology in America	<i>Lucien M. Underwood</i>	963
The Perissodactyla. [Illustrated.]	<i>E. D. Cope</i>	985, 1060
How the Great Northern Sea-Cow (<i>Rytina</i>) became Exterminated	<i>Leonhard Stejneger</i>	1047

EDITORS' TABLE.

American Biological Instruction, 59; The American Naturalist, 163; Vertebrate Palæontology of the U. S. Geol. Survey, 164; Use of English Names for Fungi, 264; Importation of Rabbits from Australia, 265; Odium Antitheologism, 356; A Universal Language, 462; The Sea-Serpent, 463; Unnatural History, 549; The International Congress of Geologists, 643; Summer Schools and Universities, 747; The American Association at New York, 833; The American Committee of the International Congress of Geologists, 835; The Death of Professor Baird, 836; Science and Duty, 922; The Relations of Mind to Matter, 1007; Whitman's Journal of Morphology, 1008.

RECENT LITERATURE.

Ridgway's Nomenclature of Colors, 166; Vine's Physiology of Plants, 266; Strasburger and Hillhouse's Practical Botany, 357; Wortman's Teeth of Vertebrata, 463; Kedzie's Gravitation, Solar Heat, and Sun-Spots, 464; Cope's *Origin of the Fittest* [Illustrated], 465; Geyler and Kinkelin's Pliocene Flora, 467; Trouessart's Microbes, Ferments, and Moulds, 551; Hay's Economic Fungology, 552; Colton's Elementary Zoology, 554; Lydekker's Catalogue of Fossil Mammalia, 554; Report of the U. S. Fish Commission for 1883, 555; Biographical Memoirs of the National Academy of Science, Vol. II., 555; Proceedings of the American Society of Microscopists, 645; Fourth Report of the Bureau of Ethnology, 646; Beal's Grasses of North America, 647; Dr. Rink's Paper on the East Greenlanders, 748; Wolle's Fresh-Water Algæ of the United States, 923; Origin of the North American Flora, 1009; Ridgway's Manual of Ornithology, 1011; Ward's Synopsis of the Flora of the Laramie Group, 1011; Keep's West-Coast Shells, 1012; Batrachians and Reptiles of Central America and Mexico, 1012; Illustrations of Vivisection, 1013; Recent Books and Pamphlets, 1014; Sixth Annual Report of the U. S. Geological Survey, 1099; Packard's Fossil Arthropods, 1100; Thomas on Mammalian Dentition, 1101; Jordan's Science Sketches, 1103; Hepaticæ Americanæ, 1104.

GENERAL NOTES.

Geography and Travels.—Alaska, 61; Source of the Mississippi, 61; Moiresnet, 62; The Caucasus, 62; Australia, 62; Formosa, 62; Borneo, 63; Last German Congo Expedition, 63; African Notes, 64; The Muir Glacier, 360; The German African Association, 361; Dr. Lenz's Journey, 361; African Notes, 362; The Dragon Lake, 362; Japan, 363; Afghanistan, 363; Asiatic Notes, 363; New Britain Group, 364; New Guinea, 365; Length of Rivers, 558; South American Exploration, 558; Congo Explorations, 559; African Notes, 560; Manchuria and Mongolia, 561; Nias, 561; Afghanistan, 561; Asiatic Notes, 562; Spain, 562; Length of Rivers, 650; Alaskan Mountains and Glaciers, 650; The Makua River, 651; The Saraswati River, 652; Prejevalsky's Explorations, 652; Mr. Carey's Journey in Asia, 653; Length of Rivers, America, Africa, Asia, 650.

Geology and Palæontology.—Primitive Forms of Cephalopods, 64; New Jersey Cretaceous, 66; Geological News, 68; Notes on Warping of the Earth's Crust and the Great Lakes, 168; Formations of the Belly River of Canada, 171; The Cross-Timbers of Texas, 172; Landslide at Brantford, Ontario [Illustrated], 267; Age of the Niagara River, 269; Palæontological Observations on the Taconic Limestones of Columbia Co., N. Y., 270; Hummocks and Boulders of Decomposition in Missouri, 366; The Dinosaurian Genus *Cœlurus*, 367; Geological News, 369; American Triassic Rhynchocephalia, 468; New Tæniodonta of the Puerco, 469; Hill on

the Cretaceous of Texas, 469; The Sea-Saurians of the Fox Hill Cretaceous, 563; The Marsupial Genus *Chirox* [Illustrated], 566; Geological News, 567; Notes on the Geology and Lithology of Lake Superior [Illustrated], 654; Pavlow on the Ancestry of Ungulates, 656; Geological News: General, 658; Cambrian, 659; Permian, 659; Trias, 659; Tertiary, 660; Postpliocene, 660; On the Glacial Flow in Iowa, 758; On the Morphology and Origin of the Ichthyopterygia, 837; The Address of Vice-President G. K. Gilbert before Section E, A. A. A. S., August 10, 1887, 841; On the Homologies of *Edestus*, 847; Scott and Osborn on White River Mammalia, 924; Marsh on New Fossil Mammalia, 926; Scott on Creodonta, 927; Zittel's Manual of Palæontology [Illustrated], 1014; A Saber-Tooth Tiger from the Loup Fork Beds, 1019; Note on the Genus *Athrodon*, 1020; The Sonora Earthquake of May 3, 1887, 1104; Crinoid Beds at Crawfordsville, Indiana, 1106; The Carboniferous Genus *Stereosternum*, 1109.

Mineralogy and Petrography.—Petrographical News, 70; Mineralogical News, 71; Meteorites, 72; Crystallographic News, 74; Rosenbusch's *Massige Gesteine*, 172; Volcanic Bombs, 271; Petrographical News, 274, 371; Mineralogical News, 275, 373; Crystallographic News, 374; Miscellaneous, 375; Petrographical News, 471; Fulgurites, 472; Mineralogical News, 472; Chemical Integration, 474; Miscellaneous, 475; Petrographical News, 568; Meteorites, 570; Recent Publications, 571; Petrographical News, 660; Crystallographic News, 663; Relations of Diamonds, 664; Petrographical News, 761; Mineralogical News, 763; Crystallographic News, 765; Miscellaneous, 766; Petrographical News, 848; Mineralogical News, 850; Crystallographic News, 852; Miscellaneous, 853; New Minerals, 1021; Recent Investigations of American Minerals, 1021; Petrographical News, 1109; Mineralogical News, 1112.

Botany.—Pollen-Tubes of *Lobelia* [Illustrated], 75; Tree-Trunk and its Branches, 76; Article "Schizomycetes" of *Encyclopædia Britannica*, 77; Botanical Journals, 79; Growing Parts of *Pinus strobus* [Illustrated], 178; Study of Plant Diseases, 276; Vegetable Pathology, 277; Botanical News, 277; Botanical Manuals for Students, 376; Centuries of North American Fungi, 379; Tomato-Rot, 380; Botanical News, 381; Smut in Oats, 475; Students as Collectors, 476; The Entomophthoræ, 477; Laboratory Notes, 477; Botanical News, 479; A Couple of Botanical Essays, 572; The Origin of the Tomato [Illustrated], 573; Experiments with Lima Beans in Germination [Illustrated], 576; Growth of *Tulostoma mammosum*, 665; Ash-Rust again, 666; Vitality of Buried Seeds, 666; Study of Lichens, 666; Botanical Works, 667; The National Herbarium, 766; A Duty of Botanists, 767; The Element of Time in Botanical Study, 768; Botanical News, 769; The Eastward Extension of *Pinus ponderosa*, 928; The Westward Extension of the Black Walnut, 929; The Iron-wood Tree in the Black Hills, 929; Still another Tumble-Weed, 929; Botany in the American Association, 930; Botanical News, 930; The Genus *Geaster* [Illustrated], 1026; Character of the Injuries produced by Parasitic Fungi upon their Host-Plants, 1114.

Entomology.—Preliminary Descriptions of Ten New N. A. Myriapods, 81; Mimicry in a Caterpillar, 82; Critical Remarks on the Literature of the Organ of Smell in Arthropods, 182; Hauser on the Organ of Smell in Insects [Illustrated], 279; The Joint-Worm in New York, 381; Relations of Ants and Aphids, 382, 579; Dipterous Larvæ in *Sarracenia purpurea*, 382; Bacteriological Studies in Arthropods, 383; Ants and Ultra-Violet Rays, 383; Light Perception by Myriapods, 384; The Hessian Fly in England, 384; Function of the Palpi in Chilopods and Spiders, 384; Necrology, 385; Entomological News, 385, 484, 580; On the Emergence of a Caddis Fly from the Water, 480; Destruction of the Coddling Moth by Arsenical Poisons, 480; Life-History of a Dipterous Parasite of the Silkworm, 482; Note on the Respiration of Aquatic Bugs, 577; Pedigree Moths, 578; Ears of Insects, 579; Exposition of Insects, 580; Singular Adaptation in Nest-making by an Ant [Illustrated], 770; A New Form of Vial for Alcoholic Specimens [Illustrated], 771; Synopsis of the Hymenoptera of America North of Mexico, 772; Liquid for Preserving Larvæ, 772; Observations on the Female Form of *Phenogodes laticollis* [Illustrated], 853; Homologies of the Wing-Veins of Insects, 932; The Genera of North American Phalanginæ, 935; Observations on Flies which

cause Diseases in Men and Animals, 1029; Lack of Parallelism between the Characters of Larvæ and Adults, 1030; The Colorado Potato-Beetle in Europe, 1030; Recent Publications, 1031; Phengodini, 1118; Senses of Insects, 1119.

Zoology.—The Cave Fauna of North America, with Remarks on the Anatomy and Origin of Blind Forms, 82; Notes on the Distribution of Shells, 83; The Characteristics and Relations of the Ribbon-Fishes, 86; The Hyoid Structure in the Amblystomid Salamanders, 87; Color of the Eyes as a Sexual Characteristic in Turtles, 88; Morphogeny of the Carapace of Testudinata, 89; Collections of Humming-Birds, 90; Nesting of Collyrio ludovicianus, 90; Zoological News: Protozoa, 389, 487, 584, 945; Cœlenterata, 390, 487, 673, 1033; Sponges, 193, 390; Echinoderms, 90, 193, 291, 391, 487, 779; Vermes, 91, 193, 291, 391, 487, 673, 779, 860, 1034; Molluscs, 194, 291, 392, 673, 780; Crustacea, 194, 393, 487, 673, 860, 945; Myriapods, 194, 945; Arachnida, 393; Tunicates, 91, 393; Fishes, 92, 393, 487, 584, 687, 861, 945, 1034; Reptiles and Batrachia, 393, 487, 585, 673, 861, 1034; Birds, 93, 291, 394, 487, 585, 861, 945, 1034; Mammals, 93, 394, 585, 673, 861, 1034; Mimicry in Amphipods, 185; Australian Cladocera, 186; The Myzostomata, 186; Anatomy of Echinorhynchi, 187; Argulus and Mortality of Fishes, 188; The Irish Red Deer, 188; The Birds of India, 189; The Zoology of British Burmah, 189; New Species of Wood-Rat from Lower California, 191; Notes on the Larger Florida Planorbis, 286; Is Littorina litorea Introduced or Indigenous? 287; Development of Alpheus, 288; Deep-Sea Isopoda, 288; Molluscs of Lake Tanganyika, 288; Echinoderm Morphology, 289; Nettle-Cells, 289; Some Rare Indiana Birds, 290; Fauna of Novaia Zemlia, 386; Pelagic Fauna of German Lakes, 386; The Structure of Fungia, 386; The Life-History of the Hydromedusæ, 387; Turning Hydra inside out, 387; Renal Organs of Invertebrates, 388; Migrations of Frogs, 388; Brazilian Reptilia, 388; Relative Weight of the Brain of Regulus and Spizella compared to that of Man, 389; Artificial Parthenogenesis, 484; Sense-Organs of Sponges, 485; Organ of Smell in Crepidula, 486; A Larval Galeodes, 486; Fauna of Liverpool Bay, 581; Systematic Position of the Sponges, 581; Parasitic Sea-Anemones, 582; Chætonotus, 583; Anatomy of Pseudoscorpions, 583; Description of a New Species of Fruit-Pigeon, 583; Haeckel's Radiolaria, 668; Ctenodrilus parvulus, 669; Balanoglossus Larvæ, 669; Glands in the Foot of Nudibranch Molluscs, 670; Underwood's Fresh-Water Crustacea, 670; Tropidonotus clarkii in Southern Louisiana, 672; Spelerpes guttolineatus in the Vicinity of Washington, 672; Muhlenberg's Tortoise at Lake George, N. Y., 672; Turning Hydra inside out,—a Correction, 773; A Remarkable Case of Phosphorescence in an Earth-Worm, 773; Dwight on the Teleology of Bone-Structure, 774; Food of Amblystoma mexicanum, 776; The Turkey-Skull, 777; Anatomy of Auks, 777; Domestication of Wild Fowl, 778; The Irish Marine Fauna, 856; Von Lendenfeld on Sponges, 856; Note on the Ctenidium of Unio aberti [Illustrated], 857; Key to the Recent Families of Sponges, 935; Occurrence of Stizostedium vitreum in the Basin of the Connecticut, 938; Birds Roosting in a Town, 939; Relation of the Dorsal Commissures of the Brain to the Formation of the Encephalic Vesicles, 940; The Tongue of Humming-Birds, 941; On the Morphology of Ribs, 942; Sense Organs of the Turbellarians, 1031; A Parasitic Rotifer, 1032; Genus Sesarma, 1032; Osteology of Alosa, 1032; A Correction, 1033; Zoological News, 1033; Fresh-Water Sponges, 1119; Arthropod Eyes, 1120; Argiope riparia var. multiconcha, 1122; The Migration of the American Magpie to Eastern Nebraska Twenty-five Years Ago, 1122; Missouri River Crow-Roosts, 1123; A Mink gnaws Iron Wire, 1124; Fauna of Beaufort, N. C., 1125; The Pug-Dog and the Chihuahua Dog, 1125.

Embryology.—Formation of Eggs and Development of Rotifers, 93; Gestation of Armadillos, 95; Two Forms of Cestoid Embryos [Illustrated], 195; Development of Scorpions, 201; Polar Globules in Crustacea, 203; Haddon's Introduction to the Study of Embryology, 292; Development of Mysis, 293; Development of Spiders, 294; Development of the Carnivora, 394; Embryology of Monotremata and Marsupialia, 489; Epiblastic Origin of the Segmental Duct, 587; Development of Spiders, 674; A Theory of the Origin of Placental Types and on Certain Vestigiary Structures in the Placentæ of the Mouse, Rat, and Field-Mouse [Illustrated], 780; The Development of an Eight-limbed Vertebrate,

862; Inversion of the Germinal Layers in *Hesperomys* [Illustrated], 863; Spermatogenesis in Mammalia, 946; Development of Cœcilians, 1035; Vestiges of a Zonary Decidua in the Mouse, 1037; The Rudimentary Pineal Eye in Cheilonians, 1126.

Anthropology.—Chinese Jade in America, 96; Ornaments on Pottery, 97; Head Flattening, 98; Love and Anthropology, 98; Loo Choo, 99; Quatrefage's Races of Men, 204; Deities of the Navajos, 206; Dr. Boas's Explorations, 206; Classification and Origin of Folk-Lore, 590; Arrow-Release among the Navajos, 784; Great Serpent-Mound, 786; Ruined Cities of Yucatan, 787; Discovery of an Ancient Tomb near the Holy Sepulchre, Jerusalem, 865.

Physiology.—Experiments in Pig Feeding, 396.

Psychology.—Perception of Space by Disparate Senses, 102; the Seat of Consciousness, 295; Remarkable Intelligence of a Rat, 295; Ants and Sunflowers, 296; Sex in Government, 399; Immortality of the Personal Consciousness, 400; Evolution and Idealism, 594; Intelligence of Echinoderms, 683; Scientific Theism, 948; On Duration of Memory in Wasps, 1038; The Theology of Evolution, 1127; An Expression of Animal Sympathy, 1129.

Microscopy.—Orienting Objects in Paraffin [Illustrated], 101; Orientation of Small Objects for Section-Cutting, 102; Practical Study of Moulds, 207; The Embryoscope [Illustrated], 297; Ryder's Automatic Microtome [Illustrated], 298; Eyes of Molluscs and Arthropods, 401; O. Schultze's Method of Preparing Amphibian Eggs, 595; Baskets for Imbedding [Illustrated], 596; A New Section Smoother [Illustrated], 597; New Paraffin Imbedding Apparatus [Illustrated], 597; Method of Staining and Fixing the Elements of Blood, 677; Albumenized Felt Tablets for Mounting Anatomical Preparations, 866; The Reduction of Chromic Solutions in Animal Tissues by Reoxidation with H_2O_2 , 868; The Naples Water-Bath [Illustrated], 951; Microtechnical Notes by Dr. Paul Mayer [Illustrated], 1040; A Method of Photographing Serial Sections, 1130.

SCIENTIFIC NEWS, 105, 208, 302, 404, 492, 600, 684, 788, 869, 953, 1043, 1132.

PROCEEDINGS OF SCIENTIFIC SOCIETIES.

Indiana Academy of Science, 107, 603; Boston Society of Natural History, 109, 209, 305, 406, 495, 602, 1138; New York Academy of Sciences, 109, 210, 305, 406, 688; Biological Society of Washington, 109, 210, 305, 406, 603, 688, 1138; Appalachian Mountain Club, 110, 305; Middlesex Institute, 210, 495, 688; Buffalo Society of Natural Science, 208; Johns Hopkins University, 209; Kent Scientific Institute of Michigan, 305; Sedalia Natural History Society, 305; Essex Institute, 407, 688; American Committee of the International Geological Congress, 407; British Association for the Advancement of Science, 492; American Association for the Advancement of Science, 492, 602, 869; American Society of Microscopists, 493; Brooklyn Entomological Society, 495; Entomological Society of Washington, 496; Harvard Natural History Society, 600; Academy of Natural Sciences of Philadelphia, 496, 687; National Academy of Science, 499, 1046; Natural Science Association of Staten Island, 603, 1045, 1137; Kansas Society of Natural History, 790.
